

R-Bootcamp Assignement

Stefan Berchtold, Gabriel Mullis

March 11, 2020

Used Packages

Following packages are used in this assignement

```
# install.packages("reshape1")
# install.packages("dplyr")
# install.packages("tidyr")
# install.packages("ggplot2")
# install.packages("ggthemes")
# install.packages("corrplot")
# install.packages("plotly")
# install.packages("tinytex")
# install.packages("knitr")
library(ggthemes)
library(ggplot2)
library(tidyr)
library(dplyr)
```

```
##
## Attaching package: 'dplyr'

## The following objects are masked from 'package:stats':
##
##   filter, lag

## The following objects are masked from 'package:base':
##
##   intersect, setdiff, setequal, union
```

```
library(reshape2)
```

```
##
## Attaching package: 'reshape2'

## The following object is masked from 'package:tidyr':
##
##   smiths
```

```
library(corrplot)
```

```
## corrplot 0.84 loaded
```

```
library(plotly)
```

```
##
```

```
## Attaching package: 'plotly'
```

```
## The following object is masked from 'package:ggplot2':
```

```
##
```

```
##     last_plot
```

```
## The following object is masked from 'package:stats':
```

```
##
```

```
##     filter
```

```
## The following object is masked from 'package:graphics':
```

```
##
```

```
##     layout
```

```
library(tinytex)
```

```
library(knitr)
```

Read in the Data

```
GDP<-readRDS("../data/GDP.RDS")
```

```
LE<-readRDS("../data/LE.RDS")
```

```
summary(GDP)
```

```
